SUPPLEMENT TO  
REPORT NO.

25X1X

25X1A. [REDACTED] Comment: All statements in this report, not otherwise dated, refer to conditions as observed by source in 1945.)

1. The Sokoyingtzu airfield is seven kilometers east of Sokoyingtzu station, which is about forty kilometers northwest of Paichengtzu (122-52, 45-37).
2. Sokoyingtzu airfield is on the northernmost extremity of a plateau adjacent to the plateau on which Pingtai and Pinganchen airfields are located. The conditions of the airfield are similar to those of the Pingtai and Pinganchen airfields -- a hard flat surface with a dense growth of grass that enables the airfield to withstand heavy rains without becoming muddy.
3. Three hangars can be seen from the Paichengtzu-Wangyehmiao (122-01, 46-05) railroad that runs west of the airfield. There is a radio station at the airfield and electricity is supplied by the power plant at Paichengtzu.
4. The airfield was used [by the Japanese] for special training and research. During World War II a Japanese Army Air Force Training School and Kamikaze squads were based at this airfield.
